*To Whom it May Concern*

Since August 2016, Bratislavsky Samospravny Kraj (BSK) has been cooperating with Exdwarf consulting on H2020 Research & Innovation project Flood-serv. During our cooperation, Exdwarf consultants always precisely supported BSK by project-managing the Slovak pilot, delivered and reviewed multiple R&D/ project tasks, participated in dissemination activities but also succeeded in building new stakeholder networks. We especially value their agility & broad knowledge of topics covering consulting, science and IT project management; but also greater sense for innovation and always friendly teamwork.

BSK can recommend Exdwarf consulting as professional and reliable partner for multinational collaborative projects.
